

(By Carl Barkow)

The season in Palm Springs really begins with the opening of school, which is next Monday. One hundred and fifty students in the high school, and 250 in the elementary school, indicate that the population of Palm Springs at this time is more than 2,000, for statisticians claim the population of a town is five times its school attendance.

The new high school undoubtedly has brought a number of new families here early this season who otherwise would not have come to Palm Springs at all. In fact, the high school records show that at least ten such families are here now. In some of these families are also grammar school students, and we anticipate enrollment in the grammar school will show an increase because of the high school now located here.

It is hoped that the Nellie N. Coffman school, for the seventh and eighth grades, to be built on school property near the high school, will be built before the beginning of another school year. This school is badly needed now to relieve the crowded condition in the Frances S. Stevens School, and it will undoubtedly eventually develop into a junior high school for the seventh, eighth

"Bill" Wells Returns From Mexico

By CARL BARKOW

Allan W. "Bill" Wells, newspaperman and radio play producer, returned to Palm Springs last week from a four months business and pleasure trip to Mexico City.

He gave this editor a thrilling word picture of Mexico and her people and promised to write a series of articles on travel in Mexico for The Desert Sun this season when he returns to Palm Springs.

Mr. Wells created the idea of and organized the Memorial Day address by President Cardenas of Mexico on May 30th this year, the first time in history that a Mexican president has participated in Decoration Day services with American residents in Mexico City. Through Mr. Wells' efforts the program was broadcast from Mexico to the people of the Americas through hundreds of radio stations in the United States, truly a "good neighbor" gesture.

While in Mexico Mr. Wells also broadcast a series of his "Major Wells Adventure Club" dramatic sketches over station XEW, the most powerful radio station in Mexico City. This series of adventure stories laid in France during the World War, in London, Paris, New York, Constantinople, Turkey, Belgium, Russia, Central Europe and Mexico, will soon be heard on the air here in the United States as Mr. Wells is now arranging for their release through one of the national radio networks.

The American Constitution contest, also a product of Mr. Wells and the Wells Feature Syndicate will be released through hundreds of newspapers throughout the United States this fall. It is an educational contest based on a series of articles on the Constitution of the United States and American Citizenship, and fills a much-needed want for a more thorough understanding of our system of government at a time when so many foreignisms are trying to wreck the old Constitution, which for more than 150 years has proven the basic key to American progress and success. We hope to be able to run the contest this season in The Desert Sun, with Mr. Wells' cooperation.

Welcome back to California. "Bill," and while we don't have eternal spring or 8,000 feet elevation like Mexico City, we do have "the finest winter climate in the world, so 'come and get it.'"

Palm Springs Theatre Opens Tonight

Earle Strebe, manager of Palm Springs' three theatres, was in the village this week and announced Thursday that the Palm Springs Theatre will open its doors for the season tonight, Friday, with the smash hit, "Letter of Introduction," scheduled for tonight and Saturday, is an Edgar Bergen-Charlie McCarthy laugh hit.

Sunday and Monday, Sept. 11 and 12, the "Amazing Dr. Clitterhouse," the year's most amazing picture, will be shown. This picture stars Edward G. Robinson as a super-doctor, super-crook, super-man.

For Tuesday of next week, Sept. 13, Mr. Strebe has not as yet secured a picture. However, a feature in line with the high type of entertainment always furnished by him will be secured by Mr. Strebe for that night.

"The Texans," a mighty romance of the Southwest, starring Joan Bennett and Randolph Scott, will be shown at the Palm Springs Theatre on Wednesday and Thursday nights, September 14 and 15.

On Friday and Saturday nights, September 16 and 17, "Spawn of the North," a lusty, romantic drama against the ice-bound background of the dangerous Arctic, will play at Strebe's theatre.

And then on Sunday and Monday, September 18 and 19, Robert Taylor, the heart-throb of a million women, in "The Crowd Roars" will be shown. This picture has been voted by a thousand critics as Taylor's best picture.

The other local theatres will not open until later in the season.

Reporter Finds His Own House On Fire

When Harold Barkow of The Desert Sun followed the fire truck yesterday morning to get the news for this newspaper, he found the roof of his own house in Desert Sands Estates was on fire.

A blow torch used by a workman, who was wiring the attic, had ignited some inflammable material, and most of the rafters and the ceiling were badly charred. The house is under construction and was to have been completed by the first of October.

All of the damaged lumber will be replaced and the house will be insulated with fireproof rock wool. The fire will delay completion about one week. The house was fully covered by insurance through the John W. Williams agency.

Building Permits

Permit was issued this week to Contractor H. H. Foster for the construction of a new residence for Johnnie Lamb, El Mirador's tennis professional, on East Mesa Drive in Palm Canyon Mesa No. 2. The permit was for \$4,800. Finlayson & Benedict are the architects. Mr. Lamb will be married soon to Miss Vosburg, a prominent Pasadena socialite, and the bridal pair will make their home in the new house.

A permit was also issued to Bob Frohn for a residence on Calle De Marcus between Alejo and Tamarisk Roads. The name of the contractor was overlooked when this newspaper checked up on the building permits.

Other permits issued this week were:

Patio wall and ramada at the A. F. Hicks home on Camino Del Sur between Camino del Mirasol and Camino del Center, \$1800. William Martz and H. L. Hansen, associate, are the contractors.

Roof on the patio at the residence of T. S. Boyd on El Camino Way. E. F. Martell, contractor.

Jack Hilery, son of William R. Hilery, Cathedral City realtor and civic leader, returned this week from a two months' vacation spent at Vancouver, British Columbia.

A Convenient Fire

Firemen Bill Leonasio and Phil Kasper didn't have to take the fire truck out of the fire station to extinguish a blaze Wednesday night.

A pile of boxes, excelsior and other inflammable material back of the telephone building, which is next door to the fire hall, caught on fire and threatened the surrounding property. Flames leaped about 20 feet into the air, but the firemen dragged the hose through the back door, started the motor which operates the pumper on the fire truck, and quickly extinguished the fire, without moving the truck.

Lions Club Buys Guide Dog For Blind Youth

One of the best services rendered by a service club that has come to this reporter's attention was the aid given a blind boy by the Palm Springs Lions Club when the club this week purchased a "seeing-eye guide dog" for Fred Souleles, a blind youth residing in Los Angeles.

Through the club's blind committee, of which Lloyd Simon is the chairman, the club raised \$500 for this purpose. Mr. Simon raised most of the money himself. This week President Francis Crocker and Vice-President Merrill Crockett went to Los Angeles and completed arrangements for the purchase of a guide dog from the National Eye Dog Association. Aid to the blind is one of the major activities of Lions International this year, and the action of the Palm Springs club is the first on record on the Pacific coast of a club having purchased a guide dog for a blind person.

Messrs. Crocker and Crockett reported full details to the Lions yesterday at the weekly luncheon at Harry's Palm Springs Cafe. They stated that Dr. W. A. Christensen, who is blind himself and manager of the association, and Captain Lambert Kraemer, trainer of the dogs, told them it costs about \$800 to train a dog for the purpose of leading the blind. Only German Shepherd dogs are used, and they are selected from kennels at the age of eight or nine months. Dogs that are frightened by

(Continued On Last Page)

Potters New Store Opens Sat. Sept. 17

One of the largest and finest hardware and household goods stores between Riverside and Phoenix will open in the Plaza Saturday of next week, by J. A. Potter, owner of Potter's popular store in Westwood Hills.

The store will occupy the large building at the corner of the Plaza and Indian avenue, occupied the past two seasons by Carl's Restaurant.

M. C. Groth, the local manager is here part of the time, and will be here permanently with his wife and child after this week. T. R. Connelly is in charge of the hardware department and a lady from San Bernardino will have charge of the pottery and art goods department.

The large room formerly used as the main dining hall of Carl's will be used for the display of pottery, dishes, and household goods.

Another room will have lawn and patio furniture. The room formerly used as a cocktail lounge, will be used for the display of a complete line of bar and cocktail fixtures and accessories. The back room, formerly the kitchen, will have a complete stock of general and building hardware, paints, etc. In addition there will be a large stockroom and warehouse.

With the exception of the specialists who will manage the various departments, only Palm Springs people will be employed, and all materials used in remodeling the store are purchased locally. Employees started yesterday that Los Angeles prices will prevail throughout the store.

Grammar School Opens Monday; Faculty of 16

The Frances S. Stevens Elementary school opens Monday at 8:00 a. m. with Miss Katherine Finchy, principal, and a staff of 14 teachers and a school nurse in charge.

School will open daily at 8 a. m. thus making it possible for the children of the first, second and third grades to complete their day's work by noon, and they will not attend in the afternoon. The other students will go home at 2:20.

The school opened last year on September 13 with 245 students. By the end of the month 310 were enrolled, and the peak was in January with 464 in attendance. It is anticipated that about the same number will enroll on Monday as on the first day of school last year.

Additional families coming here early this year because Palm Springs has a high school now will probably increase the elementary school enrollment because some of these families also have children under high school age.

The cafeteria will also open Monday and the children can purchase their lunches at school at a very low price. The complete menu for the week is published herewith, and the menu for each day hereafter throughout the school year will be published in The Desert Sun.

In addition to the eight regular rooms, the school has six special or

(Continued On Last Page)

Wm. J. Cross Is Appointed Agent Stevens Estates

William J. Cross, associated with the Harold J. Hicks agency the past few years, has obtained his real estate broker's license and has been appointed exclusive agent for Nichols Properties and Stevens Estates, including Palm Springs Estates No. 2 and No. 5, El Mirador Estates 1 and 3. The properties include the former Stevens Golf Course.

These properties are all supplied with an abundant supply of irrigation water from the Whitewater Mutual Water Company, developed by the late P. T. Stevens, former owner of the properties. With each lot will go two or more shares of water stock, assuring the purchaser a perpetual supply of free water, the only expense insured for water being each stockholders' small assessment, when needed, for the maintenance of the pipe lines. Lots range in size from 110x110 feet, one to 8-acre tracts. The abundance of irrigation water will interest buyers who desire large lawns, gardens and heavy plantings of trees and shrubbery.

In addition to the irrigation supply, pipe lines of the Palm Springs Water Co. connect with all the lots for the domestic supply of water. All other utilities, electricity, gas, and telephone lines are also underground.

The late William Patton was formerly agent for these properties, and after the death of Mr. Patton, Herbert Samson looked after the business until a new agent could be appointed.

Mr. Cross will cooperate with all the realtors of Palm Springs, and all members of the real estate board will have the properties listed.

Colgate Appointed Attorney for Beaumont Irrigation District

Attorney Roy Colgate of Palm Springs, of the law firm of Sarau and Thompson of Riverside was retained by the Beaumont Irrigation district as attorney at the regular board meeting Tuesday.

Colgate succeeds Attorney R. S. Harrington of Beaumont, who resigned effective September 1 when his duties in private practice and as city attorney came in conflict with the interests of the irrigation district.

The Jordan river daily pours an average of 6,000,000 tons of water into the Dead Sea, all of which disappears by evaporation.

City Officials At Convention of Municipal League

Five members of the city council and other city officials were in Santa Barbara the past two days to attend the convention of the League of California Municipalities, of which the city of Palm Springs is a member.

Among those attending from here were Mayor Philip Boyd, Councilmen Frank V. Shannon, Alvah F. Hicks, Frank Pershing and Dr. Bacon L. Clifton; City Clerk Guy Pinney. Planning Commissioners John Porter Clark and John R. E. Chaffey.

200 Visit Palm and Andreas Canyons, 2 days

Thirty-eight cars carrying approximately 200 people visited Palm and Andreas canyons on Sunday and Monday. Sunday there were 16 cars and Monday, 21. The roads are open and in good condition. H. H. Quackenbush, in charge of the Indian reservation, anticipates that travel to the two scenic spots will increase constantly from now on until the peak of the tourist season.

More parking space for cars has been provided in both of the canyons and there is considerable more space for picnic parties, especially in Andreas canyon.

Darnells Return with New Car From Long Trip

Mr. and Mrs. B. F. Darnell returned Monday from a month's vacation spent in the East and Middle West. At Rochester, Minnesota, both received thorough examinations by the doctors of the famous Mayo Clinic, who found that the Palm Springs climate had kept the Darnells in A-1 condition.

At South Bend, Indiana, they took delivery on a new Chrysler Imperial sedan. At Lake Tahoe they visited with their son, Jack, who has enrolled at the University of Nevada at Reno for this winter. Jack has been assisting his father at the bowling academy here the past few seasons. The Darnells spent a short time at their cabin at Big Bear Lake and then returned to Palm Springs.

Mr. Darnell's Palm Spring Bowling Academy will open for the season about September 20. Four new alleys were put in this summer, making a total of 12 alleys, said to be the finest and most modern in the state.

Earl Gray and Family Return For Season

Mr. and Mrs. Earl Gray returned yesterday after a delightful summer at Balboa. Most of their time was spent cruising along the coast in their yacht. They went on numerous fishing trips often into Mexican waters and were accompanied by Palm Springs friends on several of these trips. Recently Mr. and Mrs. William Seaton went with them on a fishing trip to the islands off the coast of Northern Mexico.

Mr. Gray is the owner and manager of the Central Hotel, Royal Palms Hotel, Garden Apartments, and the store rooms on Palm Canyon Drive in front of the Central and Royal Palms Hotels. All of these are now ready for hotel guests or tenants.

Weingartens Return For Busy Season

Al Weingarten, insurance broker, has returned for the season and is spending most of his time in his office in the Robert Ransom suite of offices in the Plaza. Mr. and Mrs. Weingarten spent most of the summer at Ocean Park, but Mr. Weingarten came here one or two days a week to look after his insurance business.

Tramway Sketch Shown

Sketches of the proposed aerial tramway to connect semi-tropical Palm Springs with the arctic-like region of Round Valley near the summit of Mt. San Jacinto, were exhibited at the Lions Club meeting yesterday noon at Harry's Palm Springs Cafe.

The sketches, made by John Porter Clark, show a proposed road from the main highway up Chino canyon to an elevation of about 3000 feet. From there the tramway would follow the ridge to Round Valley, elevation 9,000 feet.

Round Valley is a beautiful flat surrounding a lake. It would be a delightful place for summer homes and for ice and snow sports throughout the winter. The tramway would provide easy and quick access to the proposed mountain playground for Palm Springs people, it being estimated that the trip could be made in a half hour.

The plan was proposed two years ago by Francis Crocker and has received the co-operation of many people, especially the Lions Club. The late Joseph Strauss, builder and designer of the Golden Gate Bridge and 500 other large bridges throughout the world, stated Mr. Crocker's plan is feasible and practical, and the tramway would undoubtedly net a profit to the owners and operators. He expressed the wish that he might be able to assist in bringing to fruition Mr. Crocker's proposal.

It was announced at the Lions Club that Mr. Clark will prepare a brochure to assist Mr. Crocker and his co-workers in presenting the plan to those who would be interested in construction of the funicular railway.

\$400,000 Annual Flood Damage In Desert

Flood damage in the desert area between Banning and the Colorado river has averaged about \$400,000 per year over a long period of years, according to the findings of Army Engineer Holman, who was here Wednesday getting further data on flood conditions, run-off, annual precipitation, etc. Mr. Holman conferred with City Engineer J. F. Davidson, Street Superintendent Jerry Sanborn, Councilman A. F. Hicks and other city officials.

The army engineer also investigated the dust menace in the desert area following each flood resulting from the spreading of silt over the gravel beds of the wide desert river-beds by flood waters. This silt dries quickly and is very light, and is consequently carried into the air by the slightest breeze for a considerable period until it is all blown away.

Due to the dust menace, it is likely that the federal engineers will recommend that flood control work proceed high in the mountains to prevent silt being carried to the lowlands. This will probably require the construction of check dams, spreading ditches, and larger dams to form reservoirs in the mountains and foothills.

BABY GIRL BORN TO MRS. C. E. PEELER

Mr. and Mrs. George Bell and son, Bob, arrived home Tuesday from Grand Rapids, Michigan, where they spent the summer. On the return trip they received a wire in Nebraska telling of the birth to their daughter, Martha, of a little four pound ten ounce girl in Panama. The baby girl's name is Phyllis Marcella. Their daughter, the former Martha Bell, is the wife of Lieut. C. E. Peeler, aviator, who is stationed at Albrook Field, Canal Zone.

Baby Phyllis Marcella was born on Monday, August 29, according to the telegram received by Mr. and Mrs. Bell.

Mr. Bell will be a bus driver for the new Palm Springs High school.

Mr. and Mrs. John Harrison have completed construction of their new residence in Cathedral City.

THE DESERT SUN

Johnson & Barkow, Publishers
Entered at the Post Office at Palm Springs, California, August 5, 1927, under the Act of Congress of March 3, 1879.

Sun Spots---

(Continued From First Page)

and ninth grades. With such a school set-up, Palm Springs would offer all the school facilities desired by those who want the best for their children. We believe Palm Springs will not be satisfied with anything less than that.

Can you think of a nobler deed than that performed by the Palm Springs Lions Club this week, when they purchased a "seeing-eye guide dog" for a blind young man who is endeavoring to make his own way in the world? The Club deserves the financial and moral support of every citizen in such humanitarian activities.

The aerial tramway intended to link Palm Springs with the snow-fields of Mt. San Jacinto is again brought to the fore by the sketches produced by John Porter Clark. Some of the people who cannot visualize a thing until they see it with their eyes, may now have a better opportunity to comprehend just what it would be like. If interested, we advise you to call on Francis Crocker and ask to see the pictures, and then get back of the movement to "put it over."

Newspaper men are forgiving souls. Right now some of the very men who tried to take the lifeblood from newspapers when they wanted the newspapers to do the county legal printing at a loss, are asking the newspapers to give of their valuable space to defeat the single-tax and anti-sales-tax proposition which will appear on the November ballot; for some of the leaders of the committee organized to fight the vicious single tax are the ones who opposed the newspaper men. Of course the newspaper men will assist the committee to the limit, paying good hard-earned money for labor and paper and postage to aid a worthy cause, asking nothing in return. No matter how often you kick a newspaper man in the pants, he will rally to your support when he thinks you are right. But we still think he should be conceded the right to make a legitimate profit so that he may continue to serve the public.

The most dangerous proposition the voters will decide on November 8th is the single tax amendment. Because tied to it is the proposition to repeal the sales tax, two classes of people will vote for it, those favoring the single tax and those opposing the sales tax. If we don't watch our step, there is danger of passage of such a vicious law, which could ruin every property owner in the state, unless he has ample outside resources. It is the duty of every citizen to thoroughly inform himself, and then to use his influence to defeat the measure. The newspaper men may have an opportunity to do more in that respect than most other citizens, and we predict they will not be derelict in their duty. We doubt if the same can be said of the operators of radio stations, for we don't believe they will do a thing in that matter unless they are paid to do it, charging full rate to those who wish radio time to inform the public.

The \$30-a-week pension plan is another measure that the voters should study. It also has possibilities of upsetting the entire state financial and tax structure. Read the act and then ask the proponents a few questions, which they will be unable to answer.

Invitations Out for
Wedding of Marcelle
Dinkle and Harold Barkow

Invitations were mailed this week for the wedding of Miss Marcelle Dinkle and Harold Barkow, which will occur at 8:30 o'clock, Saturday morning, September 17, in the garden of Hotel Banning.

Miss Dinkle is a lovely young lady who has resided in Banning during the past year, being employed as nurse in the office of Dr. Leonard Wood. She came here from Santa Ana. She is the daughter of Mr. and Mrs. Clement Dinkle of Salina, Kansas.

Mr. Barkow is the son of Mr. and Mrs. Carl Barkow, and he is advertising manager of The Desert Sun.

Mr. Barkow is building a new home in Desert Sands Estates, in Palm Springs, and he and his bride will make their home here.

Final Count of Primary Election

Final results of the primary election, including absentee ballots and officials returns from the 166 county precincts, were revealed Thursday from the office of the county clerk.

For the past three days, four special canvassing boards had been tabulating the 1345 absentee votes.

No major changes were recorded, and the complete results verified that Charles Stibbens, incumbent, and Charles B. Jones will run-off in November, while Sheriff Carl F. Rayburn must oppose Roman Warren for his office in the finals.

The complete official returns for Republican, Democratic and non-partisan offices of the county and Riverside township:

Non-Partisan

Superintendent of Public Instruction: Bennett, 4940; Dexter, 13,476; Ewing, 3988.

Clerk: Dudgeon, 6252; Pequegnat, 19,313.

Sheriff: Burnett, 660; Hoagland, 5323; Rayburn, 14,182; Stanford, 2654; Warren, 7132.

District Attorney: Redwine, 15,813; Rouse, 12,389.

Tax Collector: Jones, 8174; Scott, 6476; Stibbens, 13,762.

Treasurer: Bush, 9243; Reimer, 16,901.

Superintendent of Schools: Smith, 21,029.

Auditor: Hicks, 23,305.

Assessor: Claytor, 23,515.

Recorder: Ross, 23,129.

Public Administrator: White, 23,558.

Surveyor: Fulmor, 22,272.

Supervisor (second district): Clay, 1205; Flaherty, 2483; Hill, 806; Russell, 746; Thurston, 425.

Supervisor (fourth district): Dillon, 3490; Dodge, 590; Roberge, 1591.

Supervisor (fifth district): Gilmore, 2397; Rawson, 538; Talbot, 3169.

Republican Party

Governor: Haight, 1565; Hatfield, 2688; Leymel, 98; Merriam, 9058; F. M. O'Connor, 400.

Lieut. Governor: Franklin, 3421; Golden, 268; Nielsen, 942; Patterson, 1361; Rolph, 3764; Seawell, 1891; Shaffer, 426; Tickle, 465.

Secretary of State: Jordan, 11,916.

Controller: McLaughlin, 842; Harry Riley, 12,196; Snider, 709.

Treasurer: Hall, 1894; Johnson, 11,873.

Attorney General: Andrews, 1207; Warren, 10,259.

Board of Equalization: Bonelli, 10,275; Kee, 2399.

Senator: Bancroft, 5506; Ray Riley, 6015; Watkins, 921.

Congressman: Johnson, 11,297; Sheppard (write-in), 72.

Assemblyman: Dilworth, 11,362.

Democratic Party

Governor: Dockweiler, 2334; Haight, 844; Legg, 622; Murphy, 707; Neblett, 537; J. F. T. O'Connor, 1618; Olson, 7001; Tomasini, 99.

Lieut. Governor: Burnett, 710; Clark, 348; Dempster, 326; DiCristina, 151; Franklin, 815; Hyde, 947; Malaby, 768; Nielsen, 1076; Patterson, 2693; Rolph, 2214; Seawell, 1147; Shaffer, 350; Sheldon, 439; Welsh, 309.

Secretary of State: Allen, 843; Bryan, 597; Gallagher, 938; Harrington, 1309; Jordan, 4783; McGroarty, 3987.

Controller: Collins, 638; Cross, 188; Lukey, 183; McLaughlin, 296; Norcop, 17775; Oppenheimer, 692; Harry Riley, 7092; Snider, 915; Welch, 355; Weller, 337.

Treasurer: Johnson, 6890; McMahon, 1182; Rosborough, 1060; Stephens, 1405; Ward, 2670.

Attorney General: Andrews, 217; Barry, 433; Brennan, 379; Cooney, 1307; Jones, 1917; Kegley, 5156; Warren, 3187.

Board of Equalization: Bonelli, 5002; Connolly, 565; Gaffney, 267; Gilreath, 768; Hicks, 702; Howland, 1009; Kee, 533; Noland, 1166; Sweeney, 317; Syracuse, 174; Thrasher, 1204.

Senator: Downey, 7110; McAdoo, 3836; Mellen, 378; Preston, 726; Ray Riley, 1502.

Congressman: Sheppard, 9237; Johnson (write-in), 127.

Assemblyman: Kirkpatrick, 3945; Maloy, 3364; Nichols, 3548.

Charles Henderson, manager of Sunshine Court and DeMuth Court, returned from Idyllwild this week and Mrs. Henderson will return here Monday.

The two courts are now open for guests. Joe Henderson returned here with his father, and he and Billy Marvin will open a sporting goods and sportswear shop in the Bowling Academy building on October 1st.

Mexico's Oil Problem

The Mexican government is trying its "level?" best not only to find a market for its oil but to create transportation for that market.

It is seriously considering two solutions, first, the purchase of several tankers from an Italian shipbuilding company, reputedly one of the largest in the world; or secondly, the building of several drydocks at Charco Redondo on Chacabua Bay—on the Pacific coast two hundred miles south of the city of Oaxaca, in which case the needed tankers could be built by the government.

At the moment there is a hitch to both these propositions.

Shortly after foreign oil properties were expropriated, Signor G. Moranti, a high official of the Italian shipbuilding company in which Il Duce is said to have more than a passing interest, offered to build tankers for the Mexican government to be paid for in installments over a period of time, but the necessary credit could not be arranged owing to the unstable financial condition of the Mexican treasury.

Mexican government engineers soon knocked a hole in the other proposition when they made their report as while the Charco Redondo site was ideal for the building of drydocks it was too remote to be practical for shipbuilding.

Aviation Gas

The refusal of American oil companies to sell aviation gas to Mexico has forced her to buy from other sources. Two hundred and fifty tons of airplane gasoline was delivered to the Mexican Aviation Co. at Veracruz

last week by the British steamer Magister, from Port Arthur, Texas.

Hearst Ranch

Employees of the Banicora ranch, which, owned by William Randolph Hearst, have asked the agrarian department to award them a portion of the property to work on a Communal basis, as all property owned by foreigners is to be confiscated by the Cardenas government.

Russian Relations

Labor organizations of Mexico have petitioned the government to negotiate for resumption of diplomatic relations with Russia. These relations were severed in 1929.

The petitioners assert that much profitable trade will result for Mexico with resumption of these relations.

Colonization, Baja California

Baja California colonists have been given 54,363 more hectares (for 1,673 families) in Mexicali valley by the national irrigation commission. There are now 25 farm colonies in the valley, nine on lands that were confiscated from the Colorado River Land Company.

Mexican Flight

Doctor Fernando Rodriguez, aviator-physician of Mexico City, will attempt a non-stop flight from Mexico City to New York City this summer. He will use a Junker speed plane and hopes to set a new record for the trip.

Texas Oil Purchase

Negotiations for the purchase of 500,000 dollars worth of oil from the Petroleos Mexicanos have been opened by the Eastern States Oil Company headquarters of which are in Houston, Texas. The company from Hous-

ton has deposited securities of its properties, as a guarantee.
Gold Export
No embargo on gold coin exports, is contemplated by the Mexican government because of speculation. The coins now sell for as high as \$4.05 a peso, with banks the heaviest buyers.

GOOD NEWS!

The Supreme Court has approved the Title of the
EMPLOYMENT RELATIONS INITIATIVE
The Secretary of State has designated the Measure as:

PROPOSITION No. 1

(GENERAL ELECTION—NOVEMBER 8th)

This Initiative was placed on the ballot by the signatures of over 205,000 voters, in response to a rising tide of protest by farmers, housewives, business men, and workers in and out of unions. Such a law is needed because ALL CITIZENS are entitled to protection.

People Everywhere Are Saying:

LABOR ABUSES MUST BE CURBED!

Individual Freedom, Liberty of Contract and Job
Protection for Workers Must be Restored

See How this Law Protects Everybody:

WORKERS CAN ORGANIZE —

(and bargain collectively without interference).

WORKERS CAN STRIKE —

(but no sit-downs, nor seizures of property).

WORKERS ON STRIKE CAN PICKET —

(but with reasonable regulations and only peaceful methods).

WORKERS ON STRIKE CAN BOYCOTT —

(but only their own employer).

BUT NOBODY CAN —

interfere with free use of the highways and wharves by farmers or anyone else.

NOBODY CAN carry on MASS picketing.

NOBODY CAN use coercion or intimidation to force free citizens to join unions, or not join them, or other un-American practices.

NOBODY CAN use the excuse of "hot cargo" for boycotting or picketing when a union official declares a commodity "unfair."

NOBODY CAN boycott those with whom they have no quarrel. In brief — no secondary boycotts.

FOR PEACE, PROSPERITY AND A FAIR AND SQUARE DEAL FOR ALL

Scientist Claims Oil To Be Found in Whitewater and Palm Springs Area

Will Palm Springs - Whitewater Canyon area produce crude oil in commercial amounts?

Yes! say geologists who have examined surface indications which appear in that part of Riverside county.

By RAY E. COLTON
Field Paleontologist and Science Writer

(Note: It has long been prophesied by geologists and paleontologists who have made minute studies of the area locally defined as Palm Springs Canyon and Whitewater Canyon, that a supply of crude oil in quantities adequate for commercial exploitation, together with reserves of natural gas, would be found in that part of Riverside county. These theories have been recently augmented, by other evidence which has been gathered during field searches in the area mentioned. In this article, these findings are revealed to the reading public, together with a scientific discussion of the origin of crude oil and how it evolved here. Republishing of any of the words of this article by any other newspaper is prohibited.—Ray E. Colton.

Palm Springs and Whitewater Areas Appear Good Points for Crude

Recent geological work in connection with study of fossil remains of marine life which existed here millions of years ago during the California inland sea, and which have been found in the local areas around Palm Springs and in Whitewater canyon, reveal, that one of the primary ingredients, namely; the organic mass of marine life, from which crude oil was first evolved, was one time prolific to the extent, that sufficient quantities of this organic mass, exist in the deep strata in the form of porous sands in the area defined above. It has been further determined on the basis of exhaustive study of anticlinal structures which appear in that part of Riverside county, that entombed in the strata folds of the anticline, is organic mass which makes oil possible. On the basis of these finds, and knowing that crude oil was evolved from marine life, vegetable matter and the remains of animal and reptilian life which existed here in this part of Southern California during remote periods of the geologic record, it would be erroneous to assume that a supply of crude was not here at some point.

It is further noted, especially in the Whitewater Canyon area, that the accepted and proven theories of oil's existence, are brought out vividly in the strata which composes the land masses at that point in Riverside county. These include, the appearance of slow decomposition of organic material which has been entrapped in argillaceous sediments and which are known as source beds. These beds were laid down in the Whitewater Canyon area by an accumulation of muds and clays and later formed into a compact form. They are of marine or brackish water origin as is evidenced by the plant and animal remains which appear in them. It is further noted from a study of the source beds, that the petroliferous material has migrated to adjacent porous rocks. This movement has evidently been caused by one or more of several forces and processes such as dehydration and induration of the clays, earth movements of a quake nature during remote geologic periods, i. e., the Miocene era of the Cenozoic geologic period, and hydrostatic pressure. A study of these porous beds which come under the geologic category of "reservoir rocks," and which are quite numerous in the Palm Springs and Whitewater areas, reveals that they are mostly of sands or sandstones, with some limestone conglomerates mixed in with them. The thing to be determined by future geological research operations in this area, is namely, that whether or not the reservoir rocks have been permeable as well as porous enough to have allowed the contained hydrocarbons to accumulate in order that a supply of crude oil in commercial quantities would be available. Once this is determined, test wells will be put down after a seismograph test has located the most favorable point for drilling operations.

In this connection, it must be well for the reader unacquainted with searches for crude oil to remember, that the attitude or shape of the reservoir rock must be such that the contained hydrocarbons have had the tendency to collect in some part under the influence of gas or hydrostatic pressure, differential gravitation, or other force. Favorable places for this concentration of gas and oil into a

commercial supply would of course be either at the top of a fold of the anticline, in a lenticular sand body, or against a fault plane, several of which are in evidence in the Whitewater Canyon area.

The Origin of Crude Oil

Crude oil which is the object of search in various parts of Riverside county at the present time, has an estimated antiquity of approximately 100 million years for this part of the North American continent. The first organic mass which formed the basis for crude oil, was the marine life such as foraminifera (tiny shells), ammonites, fish, etc., which inhabited the waters of the vast sea which inundated this part of the state of California during the Miocene period of the major Cenozoic geologic era. This life, later entombed in the strata of an anticline which was thrown up during an upheaval here in the San Jacinto mountain range, on dying, left permanent remains in the form of silicates and carbonates of lime—the matter of shell and bones. The agency which solidified this organic mass of marine life in the depths of the sea and later in the folds of the anticline, was subterranean heat. Following this upheaval, came tropical plant life such as fern, palm, conifer trees and the reptilian life of the species of dinosaurs which is exemplified by Tyrannosaurus Rex, a giant flesh eater which roamed this part of California in the dim past. Both of these forms of life, the plant and the reptilian, on dying, left remains in organic mass which formed the second and third basis for crude oil. Thus, it has been determined by geological studies relative to the evolution of crude oil in prehistoric areas, that three major substances were responsible.

All of the forms of life which made crude oil possible, have been here in this part of Southern California at one time or another. Combining their organic masses, they have melted down through the aeons of time, and are today sought as a future supply for the motors of a present day civilization.

The Geologic Record as Exemplified in Palm Springs and Whitewater Areas

In connection with searches for oil bearing strata, and possible accumulations of CO₂, carbon dioxide gas from which dry ice is made in the areas around Palm Springs, Whitewater, Banning and Idyllwild, it is noted, that a complete chronological record of nature's work here in the dim past, is seen. In the fossil remains of marine life, such as sea shell, portions of fish, shark's teeth, etc., which have been found in this part of Riverside county, Old Mother Nature tells of

the time when a vast sea inundated this area. In the bones of mastodons and other animals she tells of the time when herds of hairy mammoths, camels, three-toed horses, etc., roamed what is today southern Riverside county.

In the uplifts, outcrops and anticlinal structures which are exemplified in the surrounding mountain ranges, nature tells of the hidden bounties of mineral wealth which she has left here for man of today to retrieve. In these, and in many other ways, the record of what transpired here in the dim past has been revealed.

On the basis of the evidence which supports the theory of the existence of crude oil in this part of California, geologists believe that the Palm Springs-Whitewater areas appear the most prolific points for the discovery of crude oil and natural gas.

The writer understands that a seismograph and magnetometer test will soon be made in the area defined above.

Entertain With Bridge-Supper

Mr. and Mrs. Homer King and Mr. and Mrs. Carl Barkow entertained Saturday evening with a bridge supper in the beautiful garden at Hotel Banning.

Prizes for high scores went to Mrs. Frederic Wing and Mrs. Backman and for second high to Mrs. Gueth and Mr. Hunt. There were also traveling prizes for making a trick with a duce. These changed hands many times.

A head-on collision occurred on U. S. Highway 99 at Cabazon Sunday morning at about 5:45, injuring four persons and causing them to be taken in an ambulance to the Banning Hospital for treatment and landing a fourth person in the Banning city jail charged with reckless driving.

The wreck occurred on a curve at Cabazon when a car driven by Julian Phillips, a colored man, who gave his address as 1229 East Washington, Phoenix, Arizona, assertedly crashed into a car driven by Xavier Henry Gusenmeyer of 758 Haight street, San Francisco. Phillips, age 46, was booked by investigating officer Gene Henderson of the State Motor Patrol on section 505B of the California Code, reckless driving with injury to person.

Mr. and Mrs. Jack Dempster, owners of Dempster Court in Cathedral City, have returned and reopened their apartments for the season.

Linkletter To Build Store Rooms In Cathedral City

A. V. Linkletter, owner of Linkletter's Ladies' Shop and DeLuxe Beauty Parlor and Barber Shop in Banning, has purchased an entire block of frontage in Cathedral City, opposite the Standard Oil Station, and will build a business block containing two or three store rooms on the main corner. The property is on the south side of the main street, and extends through to the next street on the south. There is 55 feet frontage on the main street and about 200 feet on the side street. The building will be completed ready for occupancy early in the season.

MR. AND MRS. PAT MURPHY OF PALM SPRINGS SHOE REPAIR SHOP RETURN FOR SEASON

Mr. and Mrs. Pat Murphy and daughter, Georgia Emily, of the Palm Springs Shoe Repair Shop, returned recently from a summer spent at Los Angeles and in touring the Western states; and Mr. Murphy announced this week that his popular shoe repair shop will open tomorrow, Saturday, for the season.

The Murphys returned to California recently from a five-weeks trip through various Western states, Arizona, New Mexico, Texas, Colorado, Wyoming, Utah and Nevada. They spent some time in Denver, Colorado, visiting with friends. The rest of the summer the Murphy family spent at Los Angeles.

During the past ten days Mr. Murphy has been making extensive improvements and alterations in his shoe repair shop on Amado Road. He is opening the establishment tomorrow with all new, latest-type shoe repairing equipment.

SHANNONS AT OAKLAND

Councilman and Mrs. Frank V. Shannon are completing their summer's vacation at Oakland. They left here the day after the primary election and went to Santa Barbara, where Mr. Shannon attended the convention of the League of California Municipalities of September 6-7-8-9. They will leave for Oakland tomorrow evening.

Clean Buildings, Clean Cities, Clean Fuel!

ARCHWAY OF THE FAMOUS SANTA BARBARA COURTHOUSE—ONE OF THE MOST BEAUTIFUL PUBLIC BUILDINGS IN AMERICA. CLEANLINESS IS CHARACTERISTIC OF NATURAL GAS CITIES BECAUSE THE AIR ITSELF IS CLEAN

Southern California—land of inviting climate, beautiful scenery and clean cities! Visitors from other regions often comment on the delightful freedom from soot. Even in commercial districts, practically all chimneys are smokeless—for most factories (and homes, too!) use natural gas. It burns clean. In addition, it does its work

supremely well and furnishes quick, high controllable energy at small cost. To get best results in home or factory, use gas equipment that includes the marvelous new labor-saving and fuel-saving improvements. See a dealer or the gas company. Inquire about the very convenient terms. SOUTHERN CALIFORNIA GAS COMPANY

sudden noises such as tooting of horns, air brakes on street cars, or that pay any attention to other dogs or cats, are rejected at once. Then the intensive training period of about nine months begins. Finally the blind recipient is coached how to work with the dog and the two are trained together.

President Crocker stated that the guide dog opens an entirely new field to a blind person who hesitates to ask other people to assist him. With his dog he can come and go as he pleases, without being dependent upon the assistance of other people. He can go to theatres, lectures, or on long hikes.

Dr. Christensen lost his own dog by death recently, and he told the Palm Springs men it was one of the worst losses he had ever suffered, for the dog had been his constant companion and guide for nine years.

The association trained and delivered 13 dogs to blind people from their Los Angeles headquarters last year.

The following letter, from the blind youth who will receive the dog, addressed to Chairman Lloyd Simon of the Lions Club blind committee, shows how badly he needs a dog and how deeply appreciative the young man is:

Dear Sir: I feel as though one of the leader dogs would be a great help to me.

First I will give you a description of myself. I am 5 ft. 11 inches and weigh 160 lbs. I'm just 21.

I am attending chiropractic college and expect to finish my education in January, 1940, after which I am sure I will be able to earn a good living. Eight years ago I joined the Boy Scouts and am now an assistant Scoutmaster with the rank of Eagle and two Palms. In Scouting I learned how to hike and camp and quite a few other things of help to me. I hold an amateur radio operator's license, W6NPX. With this letter I will enclose one of my station cards with a picture of the transmitter and myself operating it.

As I have told you I go to chiropractic college and starting in the first of September I will be leaving my home at 7:30 a. m., and not returning until after dark. My only means of transportation is the street car and since I must transfer the leader dog would be of great help to me. Also one would be of great value when I travel around visiting my friends.

I live at home and my parents would not object to my owning a leader dog. I have a house of my own and the dog would be good company for me. His food could be taken care of and I would take good care of him.

I have a friend who owns one of these dogs and not long ago this dog guided me very successfully through a busy section of town, so I know I could manage one.

I have found that in many ways a leader dog would be of great help and if you are able to help me get one I would very greatly appreciate it.

I know you're going to help me obtain one of the dogs, so thanks a lot for the help.

Very sincerely yours,
FRED SOULELES.

Pay telephone bills before the 25th and receive discount.

adjustment classes. The auditorium, stage, cafeteria room and library are used for four of these classes. Last year four rooms were constructed and four more are still needed. This handicap is expected to be overcome by the construction of the new Nellie N. Coffman school of three class rooms for the seventh and eighth grades near the high school.

Members of the faculty of the Frances S. Stevens Elementary school are: Miss Katherine Finchy, principal. Miss Madeline Travis, first grade. Miss Geraldine Hayes, second grade. Miss Virginia Youngling, third grade. Miss Lucille Nixon, fourth grade. Miss Nixon was not here last season, for she spent the past year in Europe taking special work and studying child psychology. She returned with a large collection of dolls, children's books and children's costumes gathered from various European countries.

Mr. Claude Gottebue, fifth grade and manual training. Miss Florence Newberry, sixth grade. Mr. Donald Cole, a new teacher who comes here from a private school in Glendora, seventh grade. Miss Era Franklin, eighth grade. Miss Mary Gene Sharpe, sub-first grade. Miss Elizabeth Allen, adjustment room for second grade. Miss Minette Scarvada, adjustment room for third and fourth grades. Miss Marjorie McCoy, adjustment room for fifth and sixth grades. Miss Kathleen Rye, adjustment room for seventh and eighth grades. Miss Inez Hendrickson, Americanization room. Miss Monica Finn, school nurse. Miss Nixon will assist Miss Finchy and Miss Finn in the testing room.

Students will be brought from Garret in a station wagon, and the 25 or 30 Cathedral City students will travel in the school bus. Both of the vehicles were purchased by the school board this summer and will be operated by the school.

STORAGE BEHIND BOULDER DAM IS NEAR 23 MILLION

Estimated storage behind Boulder dam on September 1 had risen to 22,940,000 acre feet, L. C. Walton, government meteorologist at Yuma, states.

Discharge for the month of August at Grand Canyon was 550,000 acre feet as compared with 431,000 in August of last year.

Discharge at Parker, below the dam, was 607,500 acre feet. Walton points out that discharge figures are provisional computations subject to correction by final report.

Larrison Car, Taken Last Week, Is Returned

It was reported in the last issue of The Desert Sun, that two boys were suspected of the theft of a car from C. W. Larrison of Cathedral City last week. The boys were captured in Blythe and the car was recovered.

Two lads with a yearning for adventure and with cast-iron consciences who left their Los Angeles homes last Sunday, ended their journey into the world in the custody of county juvenile authorities at Riverside Friday night, after having been picked up by Deputy Sheriff Jesse Ullom at Blythe Friday morning.

When the desert deputy walked into Sheriff Carl F. Rayburn's office with the youngsters, one 14 and the other 12 years of age, he was unaware that his capture would help solve the theft of an automobile and two bicycles, and the burglarizing of three small stores—all reported within the last few days.

A sheaf of teletype messages sent out and received by the sheriff's office concerning the thefts proved interesting reading to Deputy Ullom, however, especially when one of the reports mentioned a pearl-handled toy pistol, part of the loot from a Mecca store.

"Why, those kids had that pistol when I picked them up, sleeping in the jungles near Blythe," exclaimed Ullom.

SIMPSON'S RADIO AND FRIGIDAIRE SHOP RE-OPENS FOR SEASON SATURDAY

Clarence Simpson, popular proprietor of the well known "Simpson's Radio and Frigidaire Shop," this week announced that the doors of his establishment will open for the season tomorrow, Saturday.

It was only last year that Simpson moved into his new building located on North Palm Canyon Drive next to the El Morocco Hotel.

Keith Geren, efficient radio technician, will be in charge of the radio service department at Simpson's again this season, and Herbert Scarborough will continue in charge of refrigeration service and installations.

Simpson's will open this season with an entire new stock of radios and Frigidaires.

Suddenly succumbing to a heart ailment from which she had suffered for a considerable period, Mrs. Agnes P. Fisher, 32, of Wickenburg, Ariz., died in an automobile at Cabazon about 1 o'clock last Thursday afternoon.

According to reports given Coroner Ben F. White, who investigated the death of the woman, she was returning to her Arizona home with her husband, Frank Fisher and brother, Andrew Clark, after having spent the summer in Redondo Beach.

ELLIS' READY TO WEAR IS NEW CLOTHING STORE OPENING ON ANDREAS ROAD

This week saw the opening of the new Ellis' Ready To Wear in the Colburn Building on Andreas Road, opposite the Nevada-California Electric Corporation.

This new clothing store, which will feature sportswear and work clothes, is owned and operated by George Ellis, former Coachella valley business man. Mr. Ellis also is the proprietor of the Banning Department Store at the Pass city.
